The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 214

NUMBER 1, MARCH 1982

COMMUNICATION

- Insulin Degradation in 3T3-L1 Adipocytes: Role of the Endocytic Lysosomal Pathway
Subal Bishayee and Manjusri Das 425

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

- γ -Glutamyl Transpeptidase and Glutathione in Aging IMR-90 Fibroblasts and in Differentiating 3T3 L1 Preadipocytes
Shizuko Takahashi and Maria Zeydel 260

BIOLOGICAL OXIDATION AND BIOENERGETICS

- A Reaction between the Superoxide Free Radical and Lipid Hydroperoxide in Sodium Linoleate Micelles
Mark W. Sutherland and Janusz M. Gebicki 1

ENZYME MECHANISMS AND METABOLISM

- Studies on the Degradation of Human Very Low Density Lipoproteins by Human Milk Lipoprotein Lipase
Chi-Sun Wang, Dieter Weiser, Petar Alaupovic, and Walter J. McConathy 26
- Mechanism of Action of t-Butyl Hydroperoxide in the Inhibition of Vitamin K-Dependent Carboxylation
Anne L. Hall, Robert Kloepper, Robert K.-Y. Zee-Cheng, Y. J. D. Chiu, Florence C. Lee, and Robert E. Olson 45
- Vitamin K-Dependent Carboxylase: Evidence for Cofractionation of Carboxylase and Epoxidase Activities, and for Carboxylation of a High-Molecular-Weight Microsomal Protein
Reidar Wallin and John W. Suttie 155
- Isolation and Characterization of Isocitrate Lyase of Castor Endosperm
O. P. Malhotra and P. K. Srivastava 164
- Some Properties of Purified 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase Phosphatases from Rat Liver
Gregorio Gil and Fausto G. Hegardt 192
- Purification of Rat Liver Monoamine Oxidase by Octyl Glucoside Extraction and Reconstitution
Mark A. Stadt, Peter A. Banks, and Rodger D. Kobes 223
- Liver Microsomal Polypeptides from Fischer-344 Rats Affected by Age, Sex, and Xenobiotic Induction
George P. Vlasuk and Frederick G. Walz, Jr. 248
- On the Lack of Formation of L-(+)-3-Hydroxybutyrate by Liver
Richard F. Scofield, Paul S. Brady, William C. Schumann, Kozikot Kumaran, Seiji Ohgaku, Joseph M. Margolis, and Bernard R. Landau 268

HORMONE STRUCTURE AND FUNCTION

- The Inhibition of Hexose Transport and Metabolism by Small Amounts of Adenosine 5'-Triphosphate in Isolated Rat Adipocytes
James M. May 56
- Effects of Sodium Tungstate on the Nuclear Uptake of Glucocorticoid-Receptor Complex from Rat Liver
Noriko Murakami, Therese M. Quattrociochi, Shaun P. Healy, and Virinder K. Moudgil 326

MEMBRANE STRUCTURE AND FUNCTION

- Further Distinguishing Properties of Mitochondrial and Microsomal Glycerophosphate Acyltransferase and the Transmembrane Location of the Mitochondrial Enzyme
Margaret A. Carroll, Peter E. Morris, Claude D. Grosjean, Thomas Anzalone, and Dipak Haldar 17
- Effect of Anti-Acetylcholine Receptor Fab Fragments from Goats on Functional Membrane-bound Receptor
M. C. Farach, M. Mihovilovic, A. Paraschos, and M. Martinez-Carrion 140
- The Lipid Integrity of Membranes of Guinea Pig Alveolar Macrophages Studied by Nanosecond Fluorescence Decay of 1,6-Diphenyl-1,3,5-hexatriene: The Effect of Stimulation by Concanavalin A and Formyl Peptides
S. N. Cherenkevich, J. M. Vanderkooi, R. Restifo, R. P. Daniele, and A. Holian 299
- The Lipid Integrity of Membranes of Guinea Pig Alveolar Macrophages Studied by Nanosecond Fluorescence Decay of 1,6-Diphenyl-1,3,5-hexatriene: The Influence of Temperature and Benzyl Alcohol
S. N. Cherenkevich, J. M. Vanderkooi, and Andrij Holian 305
- Membrane Alterations in Cellular Aging: Susceptibility of Phospholipids in Density (Age)-Separated Human Erythrocytes to Phospholipase A₂
Shivendra D. Shukla and Donald J. Hanahan 335

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Glutamate Metabolism Triggered by Oxaloacetate in Intact Plant Mitochondria
Etienne-Pascal Journet, Walter D. Bonner, and Roland Douce 366

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Aging-Related Decrease in Hepatic Cytochrome Oxidase of the Fischer 344 Rat
Marie L. Vorbeck, Arlene P. Martin, Juliet K. J. Park, and John F. Townsend 67
- Calorimetric Studies of Flavin-Binding Proteins: FMN and FAD Binding to Hen Egg Riboflavin-Binding Proteins
Henry P. Nowak and Neal Langerman 231

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Undersulfated Proteoglycans Are Induced by the Ionophore Monensin: Study of Possible Mechanisms
Toshihide Kajiwarra and Marvin L. Tanzer 51
- Substrate Specificity of Mammalian Endo- β -N-Acetylglucosaminidase: Study with the Enzyme of Rat Liver
Yoko Tachibana, Katsuko Yamashita, and Akira Kobata 199

PROTEIN STRUCTURE AND FUNCTION

- Electrofocusing-Induced Alteration in the Net Charge of Human Macrophage-Stimulating Protein
Edward J. Leonard, Alison Skeel, and Stig Allenmark 12
- Differences in the Polymorphic Forms of Metallothionein
Dennis R. Winge and Kathy-Anne Miklossy 80
- Fructose 1,6-Bisphosphate Aldolase of *Drosophila melanogaster*: Comparative Sequence Analyses around the Substrate-Binding Lysyl Residue
Olga Brenner-Holzach and Carla Zumsteg 89

Stabilization of the Structure and Activity of Yeast Carboxypeptidase Y by Its High-Mannose Oligosaccharide Chains	<i>Frederick K. Chu and Frank Maley</i>	134
Flagellar Adenosine Triphosphatases from Annelid Spermatozoa: Electrophoretic Identification of Dyneins	<i>Ken-Ichi Nakamura, Etsuko Masuyama, Toshinobu Suzaki, and Yoshinobu Shigenaka</i>	172
Synthesis, Characterization, and Biological Activity of N^{α} -(<i>N</i> -Fluoresceinthiocarbamoyl)-(Asp ¹ , Ile ⁵)-angiotensin II	<i>Larry D. Barnes, Michael N. Guy, Glenda M. Roberson, and Richard W. Osgood</i>	239
Intact Form of Myeloperoxidase from Normal Human Neutrophils	<i>Marion R. Andersen, Curtis L. Atkin, and Harmon J. Eyre</i>	273
Abnormal Neutrophil Myeloperoxidase from a Patient with Chronic Myelocytic Leukemia	<i>C. L. Atkin, M. R. Andersen, and H. J. Eyre</i>	284
Limited Proteolysis of Liver and Muscle Aldolases: Effects of Subtilisin, Cathepsin B, and <i>Staphylococcus aureus</i> Protease	<i>Ewald Hannappel, John S. MacGregor, Stephen Davoust, and B. L. Horecker</i>	293
Purification of Tetanus Toxin and Its Peptide Components by Preparative Polyacrylamide Gel Electrophoresis	<i>Samuel J. DiMari, Mary A. Cumming, John H. Hash, and John P. Robinson</i>	342
Characterization of Tetanus Toxins and Toxin Components by Amino Terminal Analyses	<i>Samuel J. DiMari, John H. Hash, and John P. Robinson</i>	354
Cathepsin M: A Lysosomal Proteinase with Aldolase-Inactivating Activity	<i>S. Pontremoli, E. Melloni, F. Salamino, B. Sparatore, M. Michetti, and B. L. Horecker</i>	376
Ammonium 4-Chloro-7-Sulfobenzofurazan: A New Fluorogenic Thio-Specific Reagent	<i>John L. Andrews, Peter Ghosh, Bela Ternai, and Michael W. Whitehouse</i>	386
The Complete Amino Acid Sequence of Bovine Liver Catalase and the Partial Sequence of Bovine Erythrocyte Catalase	<i>Walter A. Schroeder, J. Roger Shelton, Joan B. Shelton, Barbara Robberson, Gerald Apell, Richard S. Fang, and Joseph Bonaventura</i>	397
The Partial Amino Acid Sequence of Human Erythrocyte Catalase	<i>Walter A. Schroeder, J. Roger Shelton, Joan B. Shelton, Gerald Apell, Leslie Evans, Joseph Bonaventura, and Richard S. Fang</i>	422

PROTEIN SYNTHESIS

Lack of Inhibition of Protein Synthesis by Double-Stranded RNA in a Cell-Free System Prepared from Human Reticulocytes	<i>Robert S. Franco, Karen Roberts, and Orlando J. Martelo</i>	186
--	--	-----

REGULATION OF METABOLISM AND OF ENZYME ACTION

Association of Cellular Retinol-Binding Protein and Several Lipid Hydrolase Activities with a Vitamin A-Containing High-Molecular-Weight Lipid-Protein Aggregate from Rat Liver Cytosol	<i>David Sklan, William S. Blaner, Noriaki Adachi, John Edgar Smith, and DeWitt S. Goodman</i>	35
Studies on Ribonucleoside-diphosphate Reductase in Permeable Animal Cells. I. Reversible Permeabilization of Mouse L Cells with Dextran Sulfate	<i>Rebecca Kucera and Henry Paulus</i>	102

Studies on Ribonucleoside-diphosphate Reductase in Permeable Animal Cells. II. Catalytic and Regulatory Properties of the Enzyme in Mouse L Cells <i>Rebecca Kucera and Henry Paulus</i>	114
Inhibition of Hepatic Gluconeogenesis and Lipogenesis by Benzoic Acid, <i>p</i> -tert.- Butylbenzoic Acid, and a Structurally Related Hypolipidemic Agent SC-33459 <i>Sylvia A. McCune, Pamela J. Durant, Lloyd E. Flanders, and Robert A. Harris</i>	124
The High Turnover Rate of Phosphatidylinositol in Chicken Heart Ventricular Cells during the Earlier Stages of Development <i>Yoshio Ishima, Yasuhito Nakagawa, and Keizo Waku</i>	180
Stimulation of Pyruvate Dehydrogenase Activity in Adipocytes by Oxytocin: Ev- idence for Mediation of the Insulin-like Effect by Endogenous Hydrogen Peroxide Independent of Glucose Transport <i>Sakti Prasad Mukherjee and Chhabirani Mukherjee</i>	211
Regulation of Cardiac Glycogen Synthase by Phosphorylation: Catalysis of In- activation by cAMP-Dependent and cAMP-Independent Protein Kinases and Comparison with the Phosphorylation of the Skeletal Muscle Enzyme <i>Subramoniam Sivaramakrishnan, Charles W. High, and Donal A. Walsh</i>	311

NUMBER 2, APRIL 1, 1982

INVITED PAPER

Biosynthesis and Biological Actions of Prostaglandins and Thromboxanes <i>Sven Hammarström</i>	431
---	-----

COMMUNICATIONS

Inhibitory Action of Erythromycin on Protein Biosynthesis by Isolated Polyri- bosomes <i>Tadahiko Otake and Akira Kaji</i>	846
Stabilization of Cholic Acid Uptake in Primary Cultures of Hepatocytes by Dexa- methasone and Tocopherol <i>John Galivan</i>	850

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

Regulation of Concentrations of Glycolytic Enzymes and Creatine-Phosphate Kinase in "Fast-Twitch" and "Slow-Twitch" Skeletal Muscles of the Chicken <i>Herbert G. Leberherz, James K. Petell, Janis E. Shackelford, and Marialyn J. Sardo</i>	642
Multiple RNA Polymerase Holoenzymes Exert Transcriptional Specificity in <i>Ba- cillus subtilis</i> <i>Roy H. Doi</i>	772

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

Interaction of Gene 5 Protein with DNA <i>Eric Holwitt and Alvin I. Krasna</i>	792
---	-----

BIOLOGICAL OXIDATION AND BIOENERGETICS

The Scavenging of Superoxide Radical by Manganous Complexes: <i>In Vitro</i> <i>Frederick S. Archibald and Irwin Fridovich</i>	452
Reye's Syndrome: Plasma-Induced Alterations in Mitochondrial Structure and Function <i>T. Y. Segalman and C. P. Lee</i>	522

Modified Oscillation Behavior and Decreased D-3-Hydroxybutyrate Dehydrogenase Activity in Diabetic Rat Liver Mitochondria	
<i>J. A. Brignone, Clara M. Campos de Brignone, R. R. Rodriguez, Blanca N. Badano, and A. O. M. Stoppani</i>	581
Intracellular Catalase Function: Analysis of the Catalatic Activity by Product Formation in Isolated Liver Cells	<i>Dean P. Jones</i> 806
Selective Destruction and Removal of Heme from Prostaglandin H Synthase	
<i>Bradley G. Titus, Richard J. Kulmacz, and William E. M. Lands</i>	824

ENZYME MECHANISMS AND METABOLISM

Human Liver Acid Phosphatases: Purification and Properties of a Low-Molecular-Weight Isoenzyme	<i>Eulazio M. Taga and Robert L. Van Etten</i> 505
The Effect of Anions on the Reaction Catalyzed by Lupine-Nodule Glutamate Dehydrogenase	<i>Stuart R. Stone and Les Copeland</i> 550
Adenosine Diphosphate-Ribosyltransferase Activity in Permeabilized Mouse Testicular Cells	<i>Akira Momii and S. S. Koide</i> 628
The Two-Step Interaction between α -Dimethylaminonaphthalene-1-sulfonyl-pepsinogen-(1-12) and Pepsin	<i>Ben M. Dunn</i> 763
Purification and Properties of Methylmalonyl Coenzyme A Mutase from Human Liver	<i>Wayne A. Fenton, Adelle M. Hack, Huntington F. Willard, Arie Gertler, and Leon E. Rosenberg</i> 815

IMMUNOLOGY

A Local Antigenic Determinant Distribution in a Continuous Antigenic Region at Residues 38-54 of Hen Egg White Lysozyme	
<i>Yutaka Takagaki, Atsushi Hirayama, Hajime Fujio, and Tsunehisa Amano</i>	750

LIPIDS

Characterization of Two Enzyme Proteins Catalyzing NADP ⁺ /NADPH-Dependent Oxidoreduction of Prostaglandins at C-9 and C-15 from Swine Kidney	<i>David Guey-Bin Chang and Hsin-Hsiung Tai</i> 464
Properties of Microsomal Acyl Coenzyme A Reductase in Mouse Preputial Glands	<i>Claudia Moore and Fred Snyder</i> 489
Regulation of Acyl Coenzyme A Reductase by a Heat-Stable Cytosolic Protein during Preputial Gland Development	<i>Claudia Moore and Fred Snyder</i> 500
Stimulation of Cyclic Nucleotide Phosphodiesterase by Products of Phosphatidylinositol Metabolism Catalyzed by Phospholipase A ₂	<i>Hsin-Hsiung Tai and Chen L. Tai</i> 622
Chain Elongation in the Formation of Polyunsaturated Fatty Acids by Brain: Some Properties of the Microsomal System	<i>Harold W. Cook</i> 695
Cholesterol Metabolism in Cancer Cells in Monolayer Culture. VI. Metabolism of High-Density Lipoprotein	<i>David Gal, Paul C. MacDonald, John C. Porter, and Evan R. Simpson</i> 726

MEMBRANE STRUCTURE AND FUNCTION

Membrane Adhesion in Reconstituted Proteoliposomes Containing the Light-Harvesting Chlorophyll a/b-Protein Complex: The Role of Charged Surface Groups	<i>Ivan J. Ryrie and Noha Fuad</i> 475
--	--

A Calorimetric Comparison of Structural Transitions of Erythrocyte Ghosts from Normal Individuals and from Patients with Muscular Dystrophy <i>John F. Brandts, Harold H. Hull, L. Michael Snyder, and Normand L. Fortier</i>	560
Evidence for Restricted Oligosaccharide Mobility at the Erythrocyte Membrane Surface: A Fluorescence Study <i>Philip S. Low, William A. Cramer, George Abraham, Roger Bone, and Mark Ferguson-Segall</i>	675
Assay and Purification of a Solubilized Membrane Receptor That Binds the Lysosomal Enzyme α -L-Iduronidase <i>Anton W. Steiner and Leonard H. Rome</i>	681

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Biosynthetic Mechanism of Ribulose-1,5-bisphosphate Carboxylase in the Purple Photosynthetic Bacterium, <i>Chromatium vinosum</i> . I. Inducible Formation <i>Hirokazu Kobayashi and Takashi Akazawa</i>	531
Biosynthetic Mechanism of Ribulose-1,5-bisphosphate Carboxylase in the Purple Photosynthetic Bacterium, <i>Chromatium vinosum</i> . II. Biosynthesis of Constituent Subunits <i>Hirokazu Kobayashi and Takashi Akazawa</i>	540
The Effects of Cations and Trypsin on Extraction of Chlorophyll-Protein Complexes by Octyl Glucoside <i>Edith L. Camm and Beverley R. Green</i>	563

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

The Effect of Temperature on the Self-Association of S5 and on the Association of S5 with S8 as Determined by Sedimentation Equilibrium <i>Stephen H. Tindall and Kirk C. Aune</i>	516
Structure and Mechanism of Action of Riboflavin-Binding Protein: Small-Angle X-Ray Scattering, Sedimentation, and Circular Dichroism Studies on the Holo- and Apoproteins <i>Thomas F. Kumosinski, Helmut Pessen, and Harold M. Farrell, Jr.</i>	714

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

Defect in 3'-Phosphoadenosine 5'-phosphosulfate Synthesis in Brachymorphic Mice. I. Characterization of the Defect <i>Kazuyuki Sugahara and Nancy B. Schwartz</i>	589
Defect in 3'-Phosphoadenosine 5'-phosphosulfate Synthesis in Brachymorphic Mice. II. Tissue Distribution of the Defect <i>Kazuyuki Sugahara and Nancy B. Schwartz</i>	602

PROTEIN STRUCTURE AND FUNCTION

Endogenous Fluorescence of Coupling Factor 1 from Spinach Chloroplasts <i>Richard Béliveau, James V. Moroney, and Richard E. McCarty</i>	668
Rabbit Liver Fructose-1,6-Bisphosphatase: Location of an Active Site Lysyl Residue in the COOH-Terminal Fragment Generated by a Lysosomal Proteinase <i>Gen-Jun Xu, Paolo Natalini, Hiroyuki Suda, Orestes Tsolas, Andrzej Dzugaj, S. C. Sun, S. Pontremoli, and B. L. Horecker</i>	688
Chemical Modification of <i>Lactobacillus casei</i> Thymidylate Synthetase with 1-Fluoro-2,4-dinitrobenzene and 1,5-Difluoro-2,4-dinitrobenzene <i>William A. Munroe and R. Bruce Dunlap</i>	742

Purification and Properties of a Toxin from the Sea Anemone <i>Condylactis gigantea</i> Alan W. Bernheimer, Lois S. Avigad, and C. Y. Lai	840
--	-----

PROTEIN SYNTHESIS

Immunochemical Analysis of Molecular Forms of Protein Synthesis Initiation Factors in Crude Cell Lysates of <i>Escherichia coli</i> J. Greg Howe and John W. B. Hershey	446
Chloroplast Elongation Factor Tu: Evidence That It Is the Product of a Chlo- roplast Gene in <i>Euglena</i> Linda L. Spremulli	734
Biosynthesis and Amino Terminal Acetylation of Cat Hemoglobin B Jane Kasten-Jolly and Fumito Taketa	829

REGULATION OF METABOLISM AND OF ENZYME ACTION

Control of <i>Mucor rouxii</i> Adenosine 3':5'-Monophosphate Phosphodiesterase by Phosphorylation-Dephosphorylation and Proteolysis Silvia Moreno, Miguel Angel Galvagno, and Susana Passeron	573
Activation of Cyclic AMP-Dependent Protein Kinase by Epinephrine in Prolif- erating Lymphoid Cells Becky A. de la Houssaye, Carolyn A. Michnoff, and Ruthann A. Masaracchia	610
Metabolism of Cytokinin: Phosphoribosylation of Cytokinin Bases by Adenine Phosphoribosyltransferase from Wheat Germ Chong-Maw Chen, Debra K. Melitz, and Fred W. Clough	634
Rat Hepatic Uroporphyrinogen III Cosynthase: Purification, Properties, and In- hibition by Metal Ions Robert P. Clement, Masahiro Kohashi, and Walter N. Piper	657
Influence of Mevalonate Kinase on Studies of the MgATP-Dependent Inactivator of 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase Gene C. Ness, Gary A. Benton, Sue A. Deiter, and Pat S. Wickham	705
Effectors of Fatty Acid Synthesis in Hepatoma Tissue Culture Cells James P. Mapes and Kathryn S. Aultman	782
AUTHOR INDEX FOR VOLUME 214	853

The Subject Index for Volume 214 will appear in the December 1982 issue as part of a cumulative index for the year 1982.

in 2026

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
111 Fifth Avenue
New York, New York 10003

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. They should not exceed five printed pages (approximately 4500 words), including tables and illustrations.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^a, ^b, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

CALCIUM AND CELL FUNCTION

Volume 1: CALMODULIN

Edited by WAI YIU CHEUNG

A Volume in the MOLECULAR BIOLOGY Series

CHAPTER HEADINGS: W. Y. Cheung, Calmodulin—An Introduction. R. W. Wallace *et al.*, Assay, Preparation, and Properties of Calmodulin. T. C. Vanaman, Structure, Function, and Evolution of Calmodulin. C. B. Klee, Calmodulin: Structure-Function Relationships. Y. M. Lin and W. Y. Cheung, Ca^{2+} -Dependent Cyclic Nucleotide Phosphodiesterase. L. S. Bradham and W. Y. Cheung, Calmodulin-Dependent Adenylate Cyclase. F. F. Vincenzi and T. R. Hinds, Calmodulin and Plasma Membrane Calcium Transport. R. S. Adelstein and C. B. Klee, Smooth Muscle Myosin Light Chain Kinase. P. Cohen, The Role of Calmodulin and Troponin in the Regulation of Phosphorylase Kinase from Mammalian Skeletal Muscle. M. J. Cormier *et al.*, Plant and Fungal Calmodulin and the Regulation of Plant NAD Kinase. H. Schulman *et al.*, Calcium-Dependent Protein Phosphorylation in Mammalian Brain

and Other Tissues. I. Hanbauer and E. Costa, Role of Calmodulin in Dopaminergic Transmission. J. F. Harper *et al.*, Immunocytochemical Localization of Calmodulin in Rat Tissues. J. G. Wood *et al.*, Immunocytochemical Studies of the Localization of Calmodulin and CaM-BP₉₀ in Brain. J. H. Wang *et al.*, Calmodulin-Binding Proteins. B. Weiss and T. L. Wallace, Mechanisms and Pharmacological Implications of Altering Calmodulin Activity. Index. References appear at the end of each chapter.

1980, 416 pp., \$46.50 ISBN: 0-12-171401-2

Subscription Price: \$39.50

Subscription prices set for individual volumes are valid only on orders for the complete set received before the publication of the last volume. Subscription prices are not valid in Australia or New Zealand.

THE MOLECULAR GENETICS OF DEVELOPMENT

Edited by TERRANCE LEIGHTON and WILLIAM F. LOOMIS

A Volume in the MOLECULAR BIOLOGY Series

From the Preface: This book arose following an experimental graduate course at Berkeley entitled "The Molecular Genetics of Development" in which many of the authors participated. As a result of our interaction during this course it became apparent that many of us were teaching, or would soon teach advanced courses in this area and that no suitable resource text existed which dealt adequately with this subject. It was also perceived that an academic monograph which stressed the conceptual and

comparative features of developmental genetics would prove useful to the diversity of scientists active in this area of research. Each chapter includes an introduction to the relevant system, a discussion of the substantive experimental facts which characterize the current state of knowledge in this area, and an examination of the general relevancy of these findings to various models for developmental regulation.

1980, 504 pp., \$49.50 ISBN: 0-12-441960-7

BIOSYNTHESIS, MODIFICATION, AND PROCESSING OF CELLULAR AND VIRAL-POLYPROTEINS

Edited by GEBHARD KOCH and DIETMAR RICHTER

FROM THE PREFACE: The significance of regulatory mechanisms acting at the translational or post-translational level has won ever increasing interest among biochemists. One aspect of these complex and interesting processes was chosen as the theme for an international conference held in Hamburg-Blankenese, May 27-31, 1980: *Biosynthesis, Modification, and Processing of Cel-*

lular and Viral Polyproteins.

HEADINGS: OPENING REMARKS. BIOSYNTHESIS OF PRECURSORS: Hypothalamic Precursors: Pituitary Precursors. Viral Precursors. PROCESSING AND MODIFICATIONS. VIRUS-CODED PROTEASES. INDEX.

1980, 360 pp., \$29.00 ISBN: 0-12-417560-0

THE EVOLUTION OF PROTEIN STRUCTURE AND FUNCTION

A Symposium in Honor of Professor Emil L. Smith

Number 21 in the UCLA Forum in Medical Sciences Series

Edited by DAVID S. SIGMAN and MARY A. B. BRAZIER

CONTENTS: S. Moore, Introductory Review to a Symposium Concerned with Forty Years of Research on Proteins. ENZYMOLOGY. I. R. Lehman, On the Role of the *recA* Protein of *Escherichia coli* in General Recombination. B. S. Hartley, Experimental Enzyme Evolution. I. Zabin, β -Galactosidase and the Lactose Operon. R. L. Hill, Glycosyltransferases in Analysis of Oligosaccharide Structure and Function. B. G. Malmstrom, Metalloenzymes. PROTEIN STRUCTURE AND FUNCTION. J. G. Pierce and T. F. Parsons, Glycoprotein Hormones: Similar Molecules with Different Functions. A. White, Thymus Hormones. Diverse Molecules Producing Similar Biological Actions. J. Eighth Sigrid Juselius Foundation Symposium, Helsinki, Finland, June 1980

Expression of Eukaryotic Viral and Cellular Genes

edited by Ralf F. Petterson, Leevi Kaariainen, Hans Soderlund and Nils Oker-Blom

August/September 1981, xii + 324pp., £20.40 (UK only) / \$49.00, 0.12.553120.6

Expression of Eukaryotic Viral and Cellular Genes stresses the importance of recombinant DNA techniques and the use of animal viruses as excellent models for studying the structure and expression of genes. Indeed, much of the current knowledge in certain areas of molecular biology comes from experiments carried out with viruses. It contains recent important papers by some of the most prominent molecular biologists in the world.

Colloid Science: A Series of Monographs

Zeta Potential in Colloid Science

R. J. Hunter

August/September 1981, xii + 378pp., £35.00 (UK only) / \$84.00, 0.12.361960.2

The book begins with a review of the theory of the electrical double layer and electrokinetics, including a unified treatment of the behaviour of liquids in narrow capillaries and porous media. Various methods for measuring the zeta potential (electroosmosis, streaming potential, electrophoresis and sedimentation potential) are described, before a consideration of the interpretation of the zeta potential. The final chapters explore the application of the zeta potential to studies of adsorption of simple ions, hydrolysable ions, surfactants and polymers) and of coagulation, flotation, sedimentation and rheology.

Genetic Engineering 2

edited by Robert Williamson

July/August 1981, xii + 204pp., £9.80 (UK only) / \$24.00 (Paper), 0.12.270302.2

Contents

A. J. Jeffreys: Recent studies of gene evolution using recombinant DNA. H. H. Dahl, R. A. Flavell and F. G. Grosveld: The use of genomic libraries for the isolation and study of eukaryotic genes. A. D. B. Malcolm: The use of restriction enzymes in genetic engineering. J. D. Beggs: Gene cloning in yeast.

Mechanisms of Cataract Formation in the Human Lens

edited by George Duncan

March 1981, x + 262pp., £20.00 (UK only) / \$48.00, 0.12.223750.1

This book provides a comprehensive and broadly-based account of the current state of cataractous lens research. Each contributing author has taken a certain area of research and has demonstrated how the fundamental techniques of developmental biology, biochemistry, physical optics and membrane biophysics are being applied to the lens in order to elucidate the underlying mechanisms of the different cataract types.
